

William H O'Brien

Work Experience

Jun 2012 - Present

Developer at iVantage Health Analytics *Web Application Development*

- Refactored value-based purchasing calculator from a procedural to an object-oriented design
- Lead multi-office staff meeting
- Rapidly adopted three new languages, 4D, SQL, and PHP

Jan 2010 – May 2011

Community Advisor Dept. Campus Life, Colby College *Residential Advisor / Hall Staff*

- Developed autonomous residence hall program emphasizing self-governance
- Road-mapped semester event programs and planned resources accordingly
- Engaged residents with dorm events and daily interactions encouraging them to participate in making their dorms home

Insert description of hall-staffly activities.

Jan 2008 - May 2011

EMT and Dispatcher at Pittsford Volunteer Ambulance *Emergency Response Services*

- Directed ambulance crews across the county via radio communications in conjunction with the 911 call center
- Coordinated multiple emergency services to ensure effective response to emergency situations
- Applied urgent and potentially life-saving interventions to patients within the scope of well-defined protocols
- Prioritized and negotiated needs of several agencies while on calls in order to ensure sufficient progression toward hitting time targets for contact, scene departure, and eventual transfer of care
- Certified the accuracy of sensitive patient information ensuring complete documentation

Dispatcher / EMT responsibilities.

Programming Languages & Markup

Novice \LaTeX

Advanced Beginner

Competent Ruby, CoffeeScript, JavaScript

Proficient Java, HTML, CSS

Applications & Frameworks

1619 Commonwealth Ave,
Brighton, MA 02135
(585) 402-6020

Education

2008 – 2012 **Bachelor of Arts, Colby College**
with Honors in Computer Science
Thesis: Web Applications and APIs in REST
GPA: 3.39 Major: 3.59

Personal Crusades & Side Projects

May 2012 – Present

Ruby on Rails

Converted thesis project to Rails to see if it would have been easier than in Java. Developed a strong appreciation for BDD. Deployed and continue to develop an online personal management service (www.blockstep.com). *Experience with:* BDD, Cucumber, Backbone.js, Ruby, Rails, MongoDB.

Jan 2011 – May 2012

Spring Framework and Virtual Machines
Developed a 3 tier todo-list application in Spring. Deployed each application tier on a separate VM. Built project into a senior thesis on RESTful web services.

Experience with: Spring (Core, MVC, Security), Dependency Injection, Dynamic Proxies, Network Proxying, RAID, bash, HTTP, MVN, Git, Tomcat6, Hibernate, Transactions, REST, JSON-schema

Fall 2010 – Jan 2011

Exploits in Networking Hosted a number of web services for use on the school's network. Experience led to much reading about anonymous networking, copyright law, patent law, and the social implications of the Internet as a means of transferring information. Most work was done remotely via command-line. *Experience with:* DNS, iptables, MediaWiki, Redmine, DC++, Darknet, Bitcoin, Tor, OpenVPN, SSL certificates, HTCP, Subversion
